

Client: KENOW**Project: Construction of new sewage sludge incineration plant****Services: Draft planning, approval planning, tendering, contract awarding****Generals**

The company KENOW with its associates

- hanseWasser,
- Oldenburgisch-Ostfriesischer Wasserverband,
- EWE WASSER GmbH and
- swb Erzeugung

is planning to build a single-line sewage sludge incineration plant at the industrial plant in Bremen for the thermal treatment of sewage sludge produced in the sewage plants of hVE, OOWV, EWE and other third parties.

Planning work

The various trades are to be handled as a joint venture by the partners:

- T&N: project management and flue-gas cleaning system

- W+G: Furnace + boiler, water-steam cycle
- PFI: Sewage sludge drying and vapour condensate treatment
- fbi: Civil engineering

The planning work for all trades is to cover the basic evaluation and preliminary planning, draft and approval planning and all other phases as set out in the HOAI (official scale of fees for services by architects).

Schedule

Tendering and contract awarding are to take place in lots in a European-wide awarding process from mid-2019 onwards. Contracts for the main lots are to be awarded in the course of 2019. Commissioning of the entire plant is envisaged for the end of 2021.
